- Harrisonburg-Rockingham Youth Data Survey ......................... 48
Introduction

Background
James Madison University’s Institute for Innovation in Health and Human Services (IIHHS) is pleased to present the 2017 Youth Data Survey for Harrisonburg and Rockingham County. The YDS has taken place every two years since 1997 and continues to provide key data about local youth risk behaviors that enables the community to develop priority areas around youth issues. Administered by IIHHS, the Youth Data Survey (YDS) is a collaborative effort involving many community partners, including: United Way of Harrisonburg and Rockingham County, Harrisonburg City and Rockingham County Public Schools, Eastern Mennonite High School, James Madison University, the Healthy Community Council, Sentara RMH Community Health, the Blue Ridge Area Health Education Center, and the Futuro Latino Coalition. Over 50 agency representatives and community volunteers assist with the administration of the survey every two years. The goal of the YDS is to examine the current and longitudinal trends around local youth risk behaviors with an approach that taps into the larger community question of what assets we need in our community to help people successfully navigate from infancy to adulthood. The objectives of the YDS for the community are the following: produce reliable information on risk behaviors; assess needs; ascertain gaps in service; assist in determining priority areas; allow agencies access to local data in order to write successful state, federal, and foundation grant applications to address the identified needs; and evaluate the impact agency programs have on the local youth over time. The ultimate goal is to improve the quality of life for the children and youth in Harrisonburg and Rockingham County.

Every two years in the fall a locally created survey is administered to approximately half of all 8th, 10th, and 12th graders in Harrisonburg City and Rockingham County. Every 10 years a committee comprised of local agency representatives and interested community members evaluate the survey and make any necessary additions and revisions. JMU students assist IIHHS staff and help secure and train agency representatives and community volunteers to administer the survey. This report would not be possible without the support of our local schools, community organizations and many dedicated volunteers.

The survey was administered during the week of November 13, 2017 to youth in Harrisonburg City and Rockingham County. Surveys were completed by 2,056 students (approximately 980 females, 1017 males, 11 transgender youth, and 26 gender non-conforming youth) between the ages of 13 and 19.

Navigation
This report presents information on key issues affecting the youth in our community. The Quick Facts section gives an overview of the assets and risk factors present in our youth. The data is then presented by categories for a more detailed investigation of assets and risk factors. Following the categories you will find some supporting data on parents. The final section includes Topical Fact Sheets that provide at-a-glance information on selected risk factors. The survey is included in the appendix for your reference.

Additional Information
In addition to the data presented in this report, IIHHS staff are available to make specialized presentations or reports for any interested group. Please contact Jennifer Rea at (540) 568-2559 or reajl@jmu.edu with requests. Archived data from all administrations of the Youth Data Survey (1997-2017) is also available on the IIHHS web site (http://www.jmu.edu/iihhs/).

Demographics 2017

Demographics
Youth by Race

Demographics
Youth by Age

Source: Rockingham County/Harrisonburg Youth Survey
What the numbers and other information told us:
The majority of teens still live with both parents, and the number has decreased by 0.9% since 2015.
What the numbers and other information told us:
The majority of youth are not employed (71.9%), a 1.7% decrease from 2015. Additionally, 28.1% of youth are employed (full or part time).
What the numbers and other information told us:
Harrisonburg’s 2017 dropout rate has tripled over the last two years, and Rockingham County’s dropout rate increased by 2% in 2016 and then decreased slightly in 2017.

What the numbers and other information told us:
Since 2010 Rockingham County has maintained a fairly consistent number of students enrolled in public schools. Harrisonburg has seen a steady incline in enrollment since 2010.
What the numbers and other information told us:
All grades levels showed an increase in the percentage of students who reported making good grades often or a lot.

Source: Rockingham County/Harrisonburg Youth Survey

What the numbers and other information told us:
In 2017, 72% of teens say that they are sexually abstinent, which is a decrease of 2% since 2015.
What the numbers and other information told us:
There is a steady increase across grades in the amount of youth that talk to their parents about sex, reaching 53.4% by the time they are in 12th grade. Of all youth surveyed, 46.4% report that they talk to their parents about this topic sometimes, often, or a lot.

What the numbers and other information told us:
The portion of youth who are sexually active increases steadily as frequency of alcohol use increases. Of youth that do not use alcohol, 35.7% report having had intercourse. Additionally, of youth that use alcohol once a week, 71.8% report having had intercourse.
What the numbers and other information told us:
Of youth who are never involved in sports, there is a higher proportion (29.8%) that are sexually active than those that are involved in sports often (26.8%). However, this number increases for those who report being involved in sports a lot.

What the numbers and other information told us:
The proportion of sexually active youth who are never involved in clubs is over 15% higher than that of those that are involved in clubs a lot.
What the numbers and other information told us:
Of youth who are never involved in church activities, there is a higher proportion (31.5%) that are sexually active than those that are involved in church activities a lot (15.9%).

What the numbers and other information told us:
The proportion of sexually active youth who are never involved in community activities is 3.6% higher than that of those that are involved in community activities a lot.
In 2015 (the most recent year available at the time of this report), the rate of teen pregnancy among females age 15-17 in Harrisonburg (13.3 per 1,000) was slightly more than the teen pregnancy rate among females age 15-17 in Virginia (12.0 per 1,000). However, this was a 7.7-point decrease from the Harrisonburg rate in 2014 (21.0).

There was a decrease in this rate in Rockingham County beginning in 2009, and 2014 saw a 3-point decrease in this area. However, a 2-point increase occurred between 2014 and 2015.

In 2017, 16.8% of teens who are sexually active say that they do not use any form of protection, which is a decrease from 2015. There was also a 7% decrease in the portion of youth who used withdrawal as a contraception method.
What the numbers and other information told us:
In 2015, the rate of births to teen girls age 15-17 in Harrisonburg (17.9 per 1,000) was more than double the birth rate among teen girls age 15-17 in Virginia (6.9 per 1,000). The 2015 rate is also a 2.9 increase from 2014. The Rockingham County live birth rate among teen girls doubled from 2014 to 2015 (4.4 to 8.8).

What the numbers and other information told us:
Harrisonburg and Rockingham County experienced an increase in teen pregnancies in all age groups between 2014 and 2015.
In 2015, the percentage of births to mothers with less than 12th grade education in Harrisonburg (25%) was 2.5 times the percentage for Virginia. The same statistic in Rockingham County is 7% higher than the percentage for the state of Virginia.

The non-marital birth rate in Harrisonburg has consistently been above the non-marital birth rate of Virginia since 2004. Note: the figures provided for non-marital births should not be used as a proxy for unplanned pregnancies.
Alcohol Use 2017

What the numbers and other information told us:
In 2017, we saw a slight increase in the daily use of alcohol compared to 2015, but we continue to see a drop in weekly, monthly and annual use of alcohol.

What the numbers and other information told us:
The number of youth reporting that it is very easy or fairly easy to get alcohol decreased by more than 4% in 10th graders and approximately 2% in 8th and 12th graders.
What the numbers and other information told us:
Only 5.1% of students whose friends disapprove of alcohol use drink at least once per month. Similarly, only 9.2% of youth whose parents disapprove of alcohol use drink at least once per month. These numbers have remained steady since 2015.

What the numbers and other information told us:
A lower proportion of youth (14.8% and 22.2%) who are involved in sports often and a lot used alcohol than those that are never involved in sports (36.5%).
What the numbers and other information told us:
Youth who are never involved in clubs report a higher rate of alcohol use (29.5%) than those that are involved in clubs.

What the numbers and other information told us:
Of youth who participate in church activities a lot, only 18.8% have used alcohol in the past year. This is over 10% less than the portion of youth (29.1%) who never participate in church activities and have used alcohol in the past year.
What the numbers and other information told us:
Of youth who are never involved in community activities, there is a higher proportion (30.8%) that used alcohol in the past year than those that are involved in community activities a lot (26.9%).
Tobacco Use 2017

**Tobacco Use**

Cumulative Frequency of Tobacco Use

![Graph showing cumulative frequency of tobacco use by frequency (daily, weekly, monthly, annually) for 2015 and 2017.]

Source: Rockingham County/Harrisonburg Youth Survey

**What the numbers and other information told us:**
There has been a decrease in the overall use of tobacco in all grades from 2015, with the largest decrease (14.9%) occurring in annual use.

---

**Tobacco Use**

Youth By Grade Who Use Tobacco At Least Once Per Year

![Graph showing percent of youth by grade and tobacco product use for 8th, 10th, and 12th grades in 2015 and 2017.]

Source: Rockingham County/Harrisonburg Youth Survey

**What the numbers and other information told us:**
All grades have seen a marked decrease in the use of tobacco annually since 2015.
What the numbers and other information told us:
The ease of access to all types of tobacco products has decreased among all grades.

What the numbers and other information told us:
Overall, 84.3% of youth feel that tobacco use is harmful or very harmful – an increase of 6% since 2015. However, a new question on the 2017 survey revealed that only 55% of youth feel that using e-cigarettes is harmful or very harmful.
Drug Use 2017

What the numbers and other information told us:
With the exception of daily use, there were decreases in the frequency of drug use since 2015.

Source: Rockingham County/Harrisonburg Youth Survey

What the numbers and other information told us:
Marijuana remained the most used drug and its usage decreased slightly from 2015. With the exception of inhalants, drug use has decreased since 2015.

Source: Rockingham County/Harrisonburg Youth Survey
What the numbers and other information told us:
With the exception of inhalants (shown in the previous graph), drug use has decreased since 2015.

What the numbers and other information told us:
There has been a slight increase in the number of 10th and 12th grade students reporting that it is very easy or fairly easy to get marijuana. However, there has been a 2.4% decrease in the number of 8th graders reporting similarly.
**Drug Use**
*Youth By Grade Who Report it is Harmful or Very Harmful to Use Marijuana*

Source: Rockingham County/Harrisonburg Youth Survey

What the numbers and other information told us:
There was an increase in the percentage of students in grades 8th and 10th who view marijuana as harmful or very harmful. Overall, 27.5% of youth feel that using marijuana is very harmful to their health.

**Drug Use**
*Use of Marijuana by Youth Whose Friends and Parents Think Marijuana Use is Wrong or Very Wrong*

Source: Rockingham County/Harrisonburg Youth Survey

What the numbers and other information told us:
Of youth whose friends disapprove of marijuana use, only 9% used the drug in the past year. Similarly, of youth whose parents disapprove of marijuana use, only 12.1% used the drug in the past year. These numbers compare to the overall portion of youth who have used marijuana in the past year: 19.6%.
What the numbers and other information told us:
Of youth who are never involved in sports, there is a higher proportion (37.1%) that used marijuana in the past year than those that are involved in sports often or a lot (11.2% and 21.1%).

What the numbers and other information told us:
Of youth who participate in clubs a lot, only 15.6% have used marijuana in the past year. This is 17.2% less than the portion of youth who never participate in clubs and have used marijuana in the past year.
What the numbers and other information told us:
Of youth who participate in church activities a lot, only 12.6% have used marijuana in the past year. This is less than one third of youth (37.4%) who never participate in church activities and have used marijuana in the past year.

What the numbers and other information told us:
Of youth who participate in community activities a lot, only 9.7% have used marijuana in the past year. This is 30% less than the portion of youth who never participate in community activities and have used marijuana in the past year.

What the numbers and other information told us:
There was a decrease in all areas since 2015 for students who reported on violence at school with weapon.
What the numbers and other information told us:
The majority of teens still do not report participating in gang activity. The numbers of youth reporting that they seldom, sometimes, or often participate in gang activity have increased slightly since 2015.
Youth Safety and Health 2017

What the numbers and other information told us:
The percentage of teens who always wear a seatbelt decreased slightly since 2015, and the percentage of those that don’t drink and drive remained steady. Reporting on a new question in 2017 reveals that 86.5% of teens report that they do not ride with someone who has been drinking.

What our Youth Report About Bullying

Source: Rockingham County/Harrisonburg Youth Survey

What the numbers and other information told us:
Although most students report they have never been bullied, 9% report having been bullied because of their physical appearance, and 13% have been electronically bullied.
Health 2017

**Feelings About Own Weight**

What the numbers and other information told us:
There was a small increase (2.5%) from 2015 in the number of youth who feel that they are slightly underweight. In addition, there was a small decrease (2.5%) from 2015 in the number of youth who feel that they are slightly overweight.

**Weight Loss Methods**

What the numbers and other information told us:
Overall, there was a decrease in the number of youth reporting that they were using these methods to lose weight. However, there was an increase (1% to 2.5%) of teens reporting that they vomited to lose weight.

Source: Rockingham County/Harrisonburg Youth Survey
What the numbers and other information told us:
As in 2015, over a quarter (25.5%) of students report having exercised all seven days of the prior week. However, 15.9% report having not exercised at all during that time period.

What the numbers and other information told us:
There was a 10% decrease in the teens who participate in church activities sometimes, often or a lot since 2015.
What the numbers and other information told us:
The reported rate at which parents set and enforce rules decreased 4-5% from 2015 to 2017.

Health

Parents Who Set Rules and Youth Who Have Sex, and Use Alcohol and Marijuana

What the numbers and other information told us:
Children of parents who never set rules are less likely to abstain from sex, alcohol use, and marijuana use than children of parents who set rules a lot.

Source: Rockingham County/Harrisonburg Youth Survey

**What the numbers and other information told us:**
In 2017 a low portion (8.2%) of youth reported they would not tell anyone if their friend was seriously thinking about suicide. Most teens (31.3%) would tell a parent or relative if they were worried about a friend committing suicide.
What the numbers and other information told us:
Of youth that have never thought about suicide, 29% use alcohol at least one per year and 13.9% use marijuana at least once per year. These statistics are lower than those for the overall population (34.6% for annual alcohol use and 19.3% for annual marijuana use).
